# PSYCHOLOGICAL ASSESSMENT REPORT

## IDENTIFYING INFORMATION:

Patient ID: PT002

Age: 32 years

Gender: Female

Date of Assessment: 2024-01-20

## TESTS ADMINISTERED:

- MMPI-2 Personality Assessment (MMPI-2)
- Cognitive Assessment Battery (CAB)

## BEHAVIORAL OBSERVATIONS:

The patient presented as cooperative throughout the assessment process. Effort appeared adequate and results are considered valid.

## TEST RESULTS AND INTERPRETATION:

### MMPI-2 Personality Assessment:

Interpretation: Elevated anxiety and worry patterns

**Cognitive Assessment Battery:**

Memory Recall: 91

Processing Speed: 88

Attention Span: 85

Executive Function: 92

Percentile: 88

Interpretation: Superior cognitive functioning

**CLINICAL NOTES:**

High functioning individual with anxiety concerns. No cognitive deficits.

**RECOMMENDATIONS:**

1. Follow-up assessment as clinically indicated
2. Consider appropriate interventions based on findings
3. Monitor progress over time
